- Documentors: Polina / Brandon

Engineers

- Eralda
- Daniel
- Lemuel

TALENTS?!?!?

COMMUNICATION

Technologies

- Discord
- Microsoft Teams

Discrepancies

- Time
- Organization

TECHNOLOGIES

Front-End

- HTML
- CSS
- Bootstrap
- JavaScript (React)

Back-End

- JavaScript

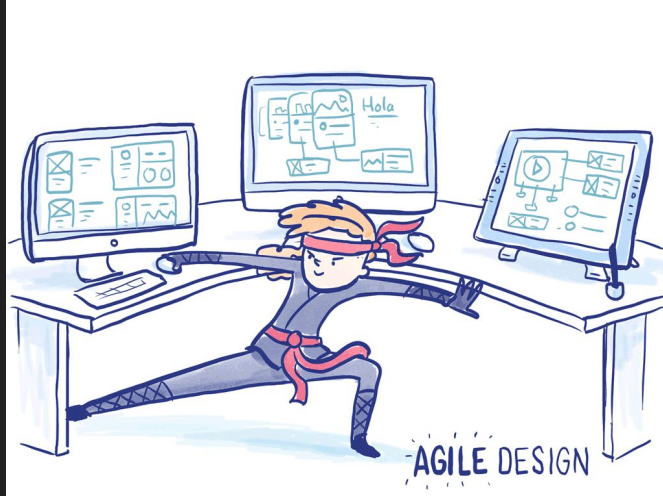

Databases

- MongoDB
- MYSQL(Schema)

Agile & Scrum Methodology

- Agile is a continuous iteration of development and testing in the software development process whereas Scrum is an Agile process to focus on delivering the business value in the shortest time. Agile methodology delivers the software on a regular basis for feedback while Scrum delivers the software after each sprint.

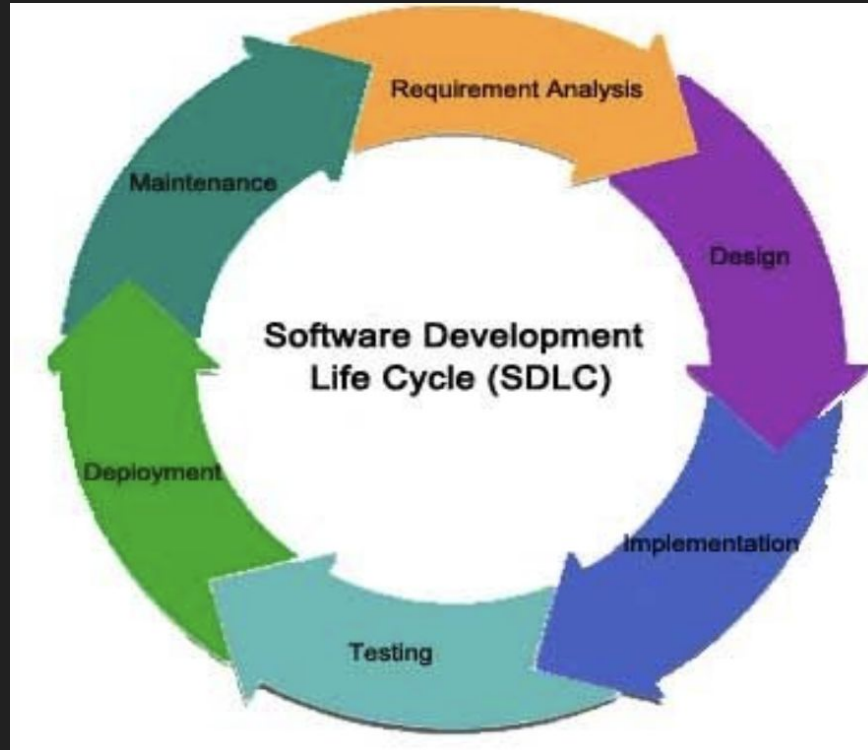

StakeHolder

Requirement Analysis - What Are We Building?

1. Airport security website where clients can go visit the page to request an order to be shipped / stored, track orders already shipped and pick up shipments already being held / stored at said airport.
2. The website should be mobile friendly.
3. Users should be able to make an account to save their information of shipments and orders. Users should be able to use tracking number to automatically get information on their package.

Our Workflow

[Lets Head Over!](#)
